

SHRUTI GUPTA

+91-8250548255 | shrutigupta.cse37@gmail.com | [LinkedIn](#) | [GitHub](#)
Durgapur, Paschim Bardhaman, West Bengal, Pin – 713203

SKILLS

- Programming:** C, Java, Python, SQL
- AI/ML:** Deep Learning, NLP, LLMs, RAG, Generative AI, Computer Vision, GANs
- Frameworks & Libraries:** LangChain, OpenCV, Scikit-learn, Keras, Pandas, NumPy, NLTK, Streamlit
- Data & Databases:** MySQL, FAISS, Power BI, Data Analysis, Data Visualization
- Development & Tools:** Git, GitHub, Jupyter Notebook, VS Code
- Core CS:** DSA, OOPs, DBMS, Operating Systems, Computer Networks

LANGUAGES

- English
- Hindi
- Bengali

INTERESTS

- Teaching
- Painting
- Watching Movies
- Learning New Skills

EDUCATION

Qualification	Board / University	Year	Percentage / CGPA
B.Tech, Computer Science & Engineering	Dr. B.C. Roy Engineering College, Durgapur	2026	7.85
Senior Secondary (XII), WBCHSE	Nepalipara Hindi High School	2022	87.6%
Secondary (X), WBBSE	Benachity Netaji Vidyalaya Hindi High School	2020	84%

EXPERIENCE

Celebal Technologies

Jun 2025 – Aug 2025

AI Medical Chat Bot using RAG –

- Built a RAG-based medical chatbot using a Large Language Model (LLM) integrated via API
- Used FAISS vector database and HuggingFace embeddings for semantic retrieval
- Implemented a LangChain-based pipeline over medical knowledge

Edunet Foundation

Nov 2024 – Dec 2024

BCREC Chat Bot –

- Built a rule-based chatbot for BCREC students using Python, NLTK and Scikit-learn
- Designed intent classification with JSON-based intents and tokenization
- Deployed an interactive chatbot UI using Streamlit

RESEARCH PUBLICATION

GAN Attention U-Net with Mamba and Dilated Convolutions for Lung Lesion Segmentation in CT

IEEE Conference Publication, 2026 | [IEEE Xplore](#)

- Developed a deep learning model combining GAN, Attention U-Net, Dilated Convolutions and Spatial Mamba for CT-based lung lesion segmentation
- Achieved 94.52% segmentation performance

PROJECT

Real-Time Facial Emotion Analysis

- Built a real-time facial emotion recognition system using CNN and OpenCV
- Detected and classified emotions from live webcam input using deep learning
- Used Python, TensorFlow/Keras and OpenCV for model training and implementation
